

Fig. 1 Top: The "midnight phenomenon". The activity of the electromagnetic impulses (shown on 5 different days) abruptly ends at midnight.

Ref. Hans Baumer: (1987) *Sferics. Die Entdeckung der Wetterstrahlung*. Rowohlt, Hamburg

Bottom: Our original recorded activity cycles of 20 caged bees in a laboratory experiment. The vertical axis (ordinate) shows the total electrical field arising from the electrostatic charging of the wings. It is clear that the bees suddenly all come to rest at midnight.

Acc. to Warnke (1982), published in Baumer's book (1987)

BEES CAN'T REST

Quiet at Midnight – a pair of charts from 1987

from *Bees, Birds and Mankind: Destroying Nature by 'Electrosmog,'*
by Ulrich Warnke, https://kompetenzinitiative.com/wp-content/uploads/2019/08/ki_beesbirdsandmankind_screen.pdf

In 1987

The electromagnetic fields of the earth, fueled by solar radiation, quieted at midnight (top chart).

The bees could rest at night (bottom chart)

Nature could rest.
We could rest.

NOW

We load our earth's biosphere with wireless, electromagnetic radiation 24/7.

There is no longer normal rest.

The bees can't rest.
We can't rest.

The rapid decline in bee colonies is alarming!

See on YouTube, *The Digital Dilemma - Documentary*, at 1:01:47 min. **The bees can no longer orient reliably, to return to the hive.**

This tragedy must wake us up!

Bees, Birds and Mankind: Destroying Nature by Electrosmog (2009) is Brochure 1 of the Series, *Effects of Wireless Communication Technologies*, from the Competence Initiative for the Protection of Humanity, Environment and Democracy.
