Description:

Ease of use for professionals and hobbyists alike. High-quality OLED display shows peak, maximum, and average readings alongside a dynamic bar graph. Indicator lights help quickly assess RF levels from slight to extreme.

Measures a wide frequency range from 200 MHz to 8 GHz, this meter accurately covers signals from 3G, WiFi, 4G, and both low-band and mid-band 5G.

Equipped with a sound option (with volume control) that reveals the chaotic RF pulsing 'signature' of each type of device, and a max reading reset button.

Also has a micro USB port for continuous power and a headphone port for private listening or public presentation.

Comes with a hard shell case, calibration certification and a [Building Biology guidelines sheet](#) that gives the recommended RF levels for sleeping areas.
