

Do you know that a 'smart' electric meter **is coming** to your home?  
We need to say **NO** to them because of these eight hazards:

- **Special Health Hazard** – Wireless 'smart' meters are known to *trigger* serious health problems in people who have not had problems being around wireless-radiating devices before.
- **Foliage Hazard** – Nearby plants die away.
- **Privacy Hazard** – New technologies can detect and record which appliances and devices we are using. This is trespassing. Private data is sent through the air where it could be hacked. Data storage centers use **A LOT** of electricity!
- **Fire Hazard** – Electronics in the meters can overheat and are not sufficiently grounded to protect buildings from extreme events.
- **Hidden Responsibility Hazard** – In case of a fire from the 'smart' meter, the home or business owner is blamed.

Can't Shut It Off.

- **Billing Hazard** – With the information that the meter records, variable charges can be imposed with little or no regulatory control. Many people are complaining about hugely-inaccurate bills and no corrections.
- **Upgrade Hazard** – The meter can be upgraded with new capabilities without notice or informed consent. This is a kind of entrapment.
- **Permanency Hazard** – Once a 'smart' meter is installed, if trouble is experienced (health, billing, fire, trespass of privacy) an analog meter is usually not promptly provided even though they **ARE** available.

'smart' meter – burning, killing foliage

safe analog meter

What kind of electricity meter do you currently have? It is usually outside near the driveway.

Dear fellow Philmont villagers and others,  
We want to alert everyone about this urgent matter! County-wide, **our safe ANALOG electricity meters** (the ones with the turning disk) are being replaced with **digital 'SMART' meters**. Already, some of the new ones have appeared on poles here in Philmont NY – they are white and have a digital screen (see on other side here). **These meters radiate 24/7. We need to keep away from them.** Taking readings of the wireless, radio-frequency radiations around our village shows that some areas are **unsafe** for walking. We should not allow these radiations to increase! Your neighbors

PASS  
THE  
WORD!

SMART ELECTRIC  
METER ALERT

Please join us and others in our county who are saying **NO** to 'smart' meters!

**It's easy! Homeowners and renters can OPT OUT of having a 'smart' meter.**

**How to do it:** 1) Contact your electric supply company now (NYSEG, 1-866-531-6313, National Grid 1-800-642-4272). Tell them that you do not want a 'smart' meter, that you want to keep your analog meter. There will be a monthly fee, but this is worth it for your safety and for the safety of your neighborhood. Renters who pay for electricity with rent can do the OPT OUT through their landlord/landlady. 2) Put a notice at the meter to be sure it isn't replaced. **Please make the call! It's easy!**

KEEP THIS CARD FOR REFERENCE

We need **CHOICE**: Pass NY bills **S6795 / A7714**

Information is posted at 113 Main St. at the corner of Summit in Philmont NY.

Good resources are: [www.NYSUMA.org](http://www.NYSUMA.org), [www.ma4SafeTech.org](http://www.ma4SafeTech.org), [www.safehelpsyou.org](http://www.safehelpsyou.org).

- ★ What are the wireless devices in your environs putting out? The Safe & Sound Pro II RF Meter (detector) is on loan at the Philmont and Roeliff-Jansen Libraries. Take one-minute readings. (Note that 'Smart' meter radiations include several extreme spikes during each minute. KEEP AWAY.)
